BLOOD REQUEST FORM (PEDIATRIC)

PATIENT :	Surname	Given Name	Middle Name	Age	Sex	Patient	Date
ADDRESS:	No/ Sttreet/Purok/Barangay	Municipality	Province	Date of Birth	Ward/Room		
CLINICAL IMPRESSION/ DIAGNOSIS:	ATTENDING PHYSICIAN:			CONTACT NUM.			

BLOOD TYPE: _____ RH _____	HEMOGLOBIN: _____	HEMATOCRIT: _____	REQUEST TYPE: () STAT () ROUTINE
History of Previous Transfusion () No () Yes	When: _____	No. of units transfused: _____	
History of Previous Reaction () No () Yes	When: _____	No. of units transfused: _____	

COMPLETE DATA NAD INDICATION NEEDED BEFORE REQUEST IS PROCESSED

CHECK COMPONENTS NEEDED AND INDICATION FOR TRANSFUSION IN THE SPECIFIED SPACE () :

WHOLE BLOOD – Approximate Volume: 500mL More than any one (1) day old

- () WB-1 Active bleeding with at least one of the following:
- () a. Loss of over 15% of blood volume
 - () b. Hemoglobin less than 90 g/L. Specify present Hemoglobin level: _____
 - () c. Blood Pressure decrease greater than 20% and less than 90 mmHg systolic
- () WB-2 Others. Please specify. (This code will automatically trigger a review of your indication.) _____

PACKED RED BLOOD CELLS (PRBC)

- () R-1 Hemoglobin less than 80 g/L or Hematocrit of less than 0.24 (if not due to treatable cause)
- () R-2 Patient for operation/ general anesthesia with one of the following:
- () a. Preoperative hemoglobin of less than 80 g/L or Hematocrit less than 0.24 (24%) or Hematocrit less than 0.30 (30%)
 - () b. Major operation with high probability of bleeding with a Hemoglobin of less than 100 g/L or Hematocrit less than 0.30 (30%)
 - () c. Sign of hemodynamic instability or inadequate oxygen carrying capacity (symptomatic anemia)
- () R-3 Symptomatic anemia regardless of Hemoglobin level (with dyspnea, syncope, postural hypotension, tachycardia, chest pain, TIA)
- () R-4 Hemoglobin less than 80 g/L or Hematocrit of less than 0.24 (24%) with concomitant hemorrhage, COPD, coronary artery diseases, hemoglobinopathy, sepsis
- () R-5 Others. Please specify. (This code will automatically trigger a review of your indication.) _____

WHOLE RED BLOOD CELLS (WRBC)

- () W-1 History of previous allergic reaction or anaphylactic reactions in immunocompromised patients
- () W-2 Transfusion of group "O" blood during emergencies when the specific blood is not immediately available
- () W-3 Paroxysmal Nocturnal Hemoglobinuria (PCH)
- () W-4 Others. Please specify. (This code will automatically trigger a review of your indication.) _____

PLATELET CONCENTRATE

- () P-1 Prophylactic administration with count less than 20,000 and not due to TTP, ITP or HUS
- () P-2 Active bleeding with platelet count less than 50,000
- () P-3 Platelet count less than 50,000 and patient to undergo invasive procedure within 8 hours
- () P-4 Platelet count less than 100,000 and patient to undergo surgery with critical areas involved (eyes, brain, etc)
- () P-5 Massive transfusion with diffuse microvascular bleeding with no time to obtain platelet count
- () P-6 Others. Please specify. (This code will automatically trigger a review of your indication.) _____

CRYOPRECIPITATE

- () C-1 Significant Hypofibrinogenemia (less than 100 mg/dL)
- () C-2 Hemophilia A
- () C-3 Von Willebrand's Disease or Uremic Bleeding with prolonged Bleeding Time
- () C-4 Others. Please specify. (This code will automatically trigger a review of your indication.) _____

FRESH FROZEN PLASMA

- () F-1 PT or PTT > 1.5 times the mild normal range within 8 hours of transfusion (PT:>17 sec/ PTT: >47 sec)
- () F-2 Specific factor deficiencies not treatable with cryoprecipitate
- () F-3 Reversal of Coumadin anticoagulation in patients who are bleeding and not transferrable with Vitamin K
- () F-4 Treatment of Thrombotic Thrombocytopenic Purpura (TTP)
- () F-5 Clinical Coagulopathy associated with:
- () a. Massive Transfusion (>20 units of blood in 24 hours)
 - () b. Late pregnancy termination or Abruption Placentae
- () F-6 Others. Please specify. (This code will automatically trigger a review of your indication.) _____

OTHER BLOOD COMPONENT: _____ **Indication/s:** _____

No. of Unit/s needed: _____

Important Reminder:

One (1) unit of WB or PRBC will Increase HCT by 0.03 (3%)
One (1) unit of Platelet Concentrate will Increase Platelet Count by 5-10 x 10/L

REQUESTED BY: _____

DATE and TIME: _____

Requesting Physician
